

HOW TO SUPERCHARGE YOUR TRANSPORT BUSINESS

Take control of your Carrier operations with one unified platform so you can move cars faster, easier and smarter.

EMPOWER YOUR FLEET WITH TECH

If you want your drivers to pickup and deliver goods on time, they need the right tool to do the job. Pen, paper, SMS, email and phone calls are time consuming and confusing. Instead you should install a designated TMS (Transport Management System).

AUTOMATE REPETITIVE TASKS

Road freight is highly repetitive. Customers book jobs, you allocate to drivers, they then pick up the goods, deliver them and you raise an invoice. Most of these processes can be automated to save you time and money

COORDINATE BACKLOADS

If you're sending a highly valuable and expensive asset (truck, driver, fuel, rego and insurance) on a long trip. It makes sense to fill the load on the way back. This will optimise your overheads and ensure you're making the most bang for your buck!

WINNING WITH CUSTOMER SERVICE

How do you differentiate your business from the competition? A system like Blink can allow your customers to book online and receive tracking updates automatically. The modern consumer expects these little luxuries or they'll go elsewhere.
